Quality certificate for return flow atomisers

Definition:

The following statement is only valid for return flow atomisers (9-)K..., (12-)N... and (12-)W..., which originate from our company and which are specially developed for use in oil burners.

Quality statement:

- Each return flow atomiser has been function tested on our test stands to ensure correct spray characteristics and operation.
- Quality, technical data and extend of delivery are in accordance with the details on our acknowledgement.
- The relevant standards as well as the rules and regulations of the European Community are observed.
- Our quality assurance system conforms to DIN EN ISO 9001.
